

Teknic Electric (I) Private Limited, Product Modification Notice
S... Series Contact Element Appearance change

Description of change:

The pad printed marking on the contact element body is changed to laser marking. No other features or specifications of contact elements have been changed.

OLD
PAD PRINTED CONTACT ELEMENTS

NEW
LASER MARKED CONTACT ELEMENTS

Impact of change:

Laser marking helps speedy permanent marking thus making product easily available. Batch number earlier available as Week number & year number (0824) is now available mentioning the exact date of manufacturing (12/05/2024) for easy traceability.

Reason for change:

To prevent or deter duplications & to distinguish Teknic design from any other Indian & international competitors. Laser marking is indelible and a permanent marking which doesn't use any additional consumables thereby reducing use of chemicals and improving products recyclability.

Scope of change:

It applies to below S... series contact elements:

S1, S2, S3, S4, S1S, S2S, ES1 & ES2

Effective date of Implementation:

15th May 2024

Both markings will be available for a short transition period. After June 2024, only laser marked contact elements will be available.
